**Merit Award:
Mozingo + Wallace Architects, LLP
Myrtle Beach, SC
Brick Manufacturer: Hanson Brick
America & Palmetto Brick Co.**

This award was for the firm's use of brick in the design of Coastal Federal Field, a multi-purpose minor league baseball stadium located in Myrtle Beach, SC.

Mozingo + Wallace formed the exterior of the stadium with a strong, bold use of contrasting brick colors at a scale that integrates the large signage and lighting elements. Their use of traditional materials of rusticated masonry and brick banding incorporating ornamental ironwork, structural steel and metal corrugated roofing, established the nostalgic feel and character of turn-of-the-century ballparks.

"Design issues of street presence, automobile access/parking, and storm water detention were very sensitively addressed in the site planning for this project," wrote the judges. "Brick piers, steel circulation and brick massing at the seating are used to further organize the building." [B]
